EXPERIENCE

Innovation & AI Specialist

July 2026 - Present

Assistant Secretary of the Air Force for Manpower & Reserve Affairs (SAF/MR)

- Partner with executive leadership to modernize a fragmented human capital technology ecosystem serving **~700,000 Airmen, Guardians, and their families** — driving IT, analytics, and AI reform across the Department of the Air Force.
- Provide strategic oversight of the DAF's human capital technology ecosystem — simplifying a fragmented landscape, making workforce data **usable and actionable for the Total Force**, and improving user experience through modern solutions.
- Lead HR IT modernization initiatives, serving as the **technical and business SME** between HR professionals and engineering teams to redesign hiring, talent management, and HR service delivery.

IT Innovation Specialist

April 2024 - July 2026

US Space Force Headquarters

- Led the push to digitize manual workforce processes across headquarters staff — recognized with the service-level **Cyber Operations Functional Award** for exceptional contributions to enterprise digital services.
- Spearheaded a personnel management system streamlining records, onboarding, and task management for **100+ personnel**, saving **500+ man-hours annually**.
- Built interactive leadership dashboards delivering real-time visibility into personnel records, leave, and budget — cutting processing time by **>50%** and saving **1,000+ man-hours/yr**.
- Created the Space Force's **first-ever automated training compliance system**, driving a 25%+ compliance improvement across ~5,000 civilian personnel.

EDUCATION

New Jersey Institute of Technology

MS – IT Administration & Security

GPA: 4.0

BS – Information Technology

Minor: Business | GPA: 4.0

Class Rank: 1 / 1,815

Summa Cum Laude

NSF CyberCorps SFS Scholar

COMPETENCIES

- AI-Enabled Transformation
- Enterprise Technology Strategy
- Business Process Modernization
- Enterprise Systems Development
- Software Development
- DevOps & Cloud Computing
- Process Automation
- Cybersecurity
- IT Governance & Compliance
- Database Management

Systems Engineer

Jan - Apr 2024

Innova Solutions · Office of the Secretary of Defense

- Kept the systems behind the **DoD's annual defense budget** running — engineered and maintained mission-critical web servers and databases supporting cost assessment across every DoD agency.
- Maintained **99.9% uptime** across 6 information systems on classified/unclassified networks for **300+ DOD users**.
- Implemented proactive cybersecurity measures — vulnerability scanning, configuration management — maintaining ATO compliance for all systems.

Cyber Program Analyst

Jun - Sep 2022

Cybersecurity & Infrastructure Security Agency (CISA)

- Helped analysts assess threats to critical infrastructure faster — developed API and UI components for "Phoenix," a DOD threat intelligence platform processing **thousands of IOCs daily**, contributing to a **70% reduction in threat research time**.
- Integrated leading threat intel providers (VirusTotal, DomainTools) to enrich IOC data, **accelerating analyst assessment workflows** and reducing manual lookup overhead.
- Built the platform's **first automated data ingestion and reporting toolset** using Docker, MongoDB, Python, and Vue.js — enabling pen testers to automate threat hunting across Phoenix operations.

Software Engineer

Jun - Aug 2021

Optum · UnitedHealth Group

- Rebuilt the costly legacy systems behind critical healthcare provider data, cutting management time by **>50%** and saving **1,200+ hours annually**.
- Delivered 3 production ReactJS apps used by **200+ employees** with SSO, RBAC, GraphQL APIs, and AWS RDS.
- Automated CI/CD pipelines (Docker, Jenkins, AWS ECR/EKS, Helm) — reducing data processing time by **>70%**.

IT Technician

Jul - Sep 2020

KIPP New Jersey

- Configured hardware across **11 sites** supporting **8,500+ K-12 students**, ensuring full operational readiness.
- Resolved network issues maintaining 99.9% uptime; managed vendor tickets, cutting average repair time by 2 days.
